

Phthalates in plastic parts

We can confirm to you that, according to the best of our present knowledge, the raw materials that are used in the manufacture of the products that we have been delivering to you from 2004 onwards contain no phthalates.

We will not carry out any analysis regarding the existence of the named material. In this context we refer to our supplier's specifications. This means that our confirmation is only valid subject to the pre-condition that our supplier's specifications are correct and that they are accurate. Ultimate certainty can only be obtained through very time and cost intensive external analyses.

We request you to note that the responsibility for products made from or with our products and their compliance with the requirements of applicable legal requirements rests with the customer. Our confirmation therefore does not absolve you of your own obligation to exercise due care.

Important note: The information given above is based on our technical knowledge at the time of publication. The information given above is accurate to the best of our knowledge at the time of publication. It is however not part of our material specification. The data does not constitute an express or implied warranty. It is the responsibility of the user to determine the conciliation of such information or the suitability of a product for the intended purpose.
